FACULTY OF VOCATIONAL EDUCATION

FACULTY OF VOCATIONAL EDUCATION

Skill Education Under Vocational Programmes at Asian International University is vital to financial development and social improvement. The statistical move makes it essential to guarantee business openings for youth entering the working age every year. To empower the business-prepared workforce in the future, the Students have to be prepared with vital skills, training and education. The country presently faces a dual challenge of extreme lack of highly- trained, quality employee as well as non-employability of expansive areas of the taught workforce that have small or no job skills.

The Skill Education at Asian International University under the vocational programmes in this way is related both to the demand and supply levels. The Skill Education prepare biological system at AIU is skewed towards a formal education framework with restricted vocational training. Whereas the vocational training is in an inauspicious state both subjectively and qualitatively, the higher education framework itself is hooked with issues related to scale and quality.

In addition, there is a detachment between formal education and work necessities, compounding the challenges related to the skill crevice. Concerted activity is in the way required on the supply side to guarantee supported employability, particularly for the youth of Manipur. Broad endeavours to aptitude the workforce are required, both in quantity and quality. Changing the Skill Development and Skill Training biological system and making it responsive to the needs of both industry and citizens.

1.	Ph.D. (Doctor of Philosophy)	Minimum 3 Years	As per UGC Regulations

INDUSTRY COLLABORATION

INDUSTRY COLLABORATION

Quality education cannot be accomplished without viable preparation. The significance of energetic preparation beneath real circumstances and case considerations can be well caught on in a competitive environment where each endeavour is result arranged and requested. Different establishments and committees have been laid and set up by the Govt. emphasising the requirement of strong industry collaboration in India which can be accomplished with synchronous endeavours of universities as it were.

In order to come up with those expectations and demands of an unexpected market, Asian International University has started Industry and University collaboration (IUC) which is one of the critical drivers of the innovation economy and carries benefits for both the industry as well as for the students. The methodology was anchored in a long-term partnership, student-first approach, real-world application challenges, and technology- based innovation with a goal of maximising the outcomes for both the IUC partners.

Recognising the trend and the growing thrust for entrepreneurship, The University has also started the Centre for Innovation and Entrepreneurship (CIE). CIE's objective is to serve as a launchpad for university students to combine technology, innovation and entrepreneurship and create value by solving real-life challenges. Industry collaboration is one of the pillars aimed at partnering with the industry to promote technology research, and innovation and seeks to nurture an entrepreneurial mindset that is increasingly sought after by the industry when hiring talent from campus.

The main objective of Industry and University Collaboration (IUC) and the Centre for Innovation and Entrepreneurship (CIE) is outlined below:

- Build relevant connections and linkages with trades/ industries/academic faculty and students.
- Enables an impactful exchange of information between academia/university and industry.
- Hold seminars/symposiums and general meetings to encourage interaction with business professionals.
- Orientation for students and the general public to encourage them to start their own businesses.
- Organization of training programs for the creation and management of industrial units.

ENTREPRENEURSHIP DEVELOPMENT CELL

ENTREPRENEURSHIP DEVELOPMENT CELL

- To act as the central facility for providing various services including information on all aspects of enterprise building to budding entrepreneurs of Asian International University.
- To create Entrepreneurial culture in Asian International University and other institutions in the region.
- To inculcate a culture of new innovation-driven entrepreneurship through student projects.
- To conduct orientation programmes for students and the public to attract them into establishing their own enterprises.
- To organize training programmes on establishing and managing industrial units.
- To provide assistance to entrepreneurs in getting bank loans, selection of staff and workers and dealing with day to day problems in their business.
- The University also has an Entrepreneurship Development cell for students who are interested in starting their own ventures. In today's business world business opportunities are not only created by external forces, but also by internal markets and entrepreneurial capabilities. The thrust mainly is to enable entrepreneurs to take advantage of market opportunities and to create the instinct of entrepreneurship amongst students. Entrepreneurship generates a large amount of employment and income options with initially small capital investments and little sophisticated and managerial & technical skills.
- Many people believe that entrepreneurs are born and not made. This is partially true, for a few are born as entrepreneurs. But it is proven that with the right type of professional training and adequate motivation entrepreneurs can be developed. With this objective in mind, we organize a few entrepreneurship development programmes. We regularly invite successful entrepreneurs to share their experiences with our students. The Entrepreneurship Development cell is responsible for such activities. The members of the cell include students of all streams who are interested in becoming entrepreneurs in future. The cell considers that its major role is to develop employment providers and not employment seekers.

CAREER ADVANCEMENT CELL

Career advisory is a department that works to synchronize the needs of the corporate world and the students. It is an institutionalized system of advisory services designed to assist students in taking decisions on career and educational guidance at different levels of education. They understand the needs of the students and clarify their goals while providing precise career advisories. Under this, our career experts and job counsellors would provide every information to the students through which they can easily achieve their career goals. How do students enrol which in their favorite subject?

How will students get easily accessed by employers? How do students prepare as per their career aims? Below, we include career counselling and individual or group counselling focused on the choice of education and career choice of the first job, changing jobs and returning to the work process. The University career advisory services will help students in the below segments:

- Assistance in how well students can prepare their CVs, Job application form, Covering letter and other Corporate / University documents.
- Bring the best solution to the students about their study options and explore career paths for the best suit.
- Guide students on how to go through interviews of varied profiles.
- Our career advisory cell prepares us for exploring and finding new jobs that can offer the best to our students.
- Implementation practice "interview" and its subsequent feedback and analysis.
- Comprehensive preparation for the selection process, recommendations on behaviour, stress management, nonverbal communication.
- Formulation of career plans whereby providing assignments and projects to the students.

ANTI - RAGGING POLICY

Ragging is defined as "Causing, inducing, compelling or forcing a student, whether by way of practical joke or otherwise, to do any act which detracts from human dignity or violates their person or exposes him/her to ridicule or forebears from doing any lawful act, by intimidating, wrongfully restraining, wrongfully confining, or injuring him or by using criminal force or by holding out to him/her any threat of intimidation, wrongful restraint, wrongful confinement, injury or the use of criminal force."

Penalty for Ragging:

University Grants Commission (UGC) guidelines as notified vide no. F.1-16/2009 (CPP-II) dated 21-10-2009 on curbing the Menace of Ragging in Higher Educational Institutions, 2009 (under section 26(1) (g) of the UGC Act, 1956), is strictly implemented at Asian International University.

In Addition to the above, those students who indulge in acts of ragging will be punished as applicable, which may include any one or a combination of the following:

1. Fine with a public apology
2. Suspension from class
3. Expulsion from the University/ hall of residence/ hostel
4. Withholding of examination results
5. Withholding of scholarship or other benefits extended to those involved in ragging
6. Debarring from representation in cultural or sports events or any other representation in events from which the student(s) may have been selected.

Right to Information:

The Asian International University (AIU) Information Monitoring Committee has been constituted in the University to enable the public to garner information as per the provisions of the Right to Information Act, 2005, which has its goal of imparting transparency and accountability in relation to all public bodies.
